DIGITAL SNAKE SYSTEM

Be Heard - Finally!

momentum™

THE END USER'S OPPORTUNITY

Do not be intimidated by the complexity of sound systems. Let us call the old way analog and the new way digital. Analog sounds great (except for the occasional hums, buzzes and crackles) and is reliable to a fault.

Analog, however, does not have the flexibility needed by the technical crew to pull off the set ups demanded by intricate programs, especially if the performance is being recorded, sent to multiple rooms, or up-linked to a satellite for broadcast.

In a large auditorium, the Momentum Digital Snake System can save up to \$100,000 in infrastructure costs (wire, connectors, conduit and labor). It vastly simplifies routing of signals throughout the facility, keeping the same great sound as it gets rid of the problems. Momentum also gives back lots of cash that you need to spend on audio gear, not on steel pipe under the floor.

Need some help sorting all this out? If you would like to bounce this off someone, call the Momentum Team at 888-253-7360. Find out how Momentum can offer you possibilities, not problems.

BENEFITS:

- » Dramatically lower sound system installation costs
- » Get the technical crew what it needs with the flexibility for modern performances
- » Meet the needs of the ministry before, during and after performance
- » Backed by a 5 year, any excuse even abuse warranty
- » Come in at or under budget
