

## USING COMPATIBILITY MODE

This procedure will allow you to always run the program as an administrator when you open it.

- » A Right click on the program shortcut or program .exe file, then click on **Properties**, and on the **Compatibility** tab. (See screenshots below)  
**NOTE:** If you are doing this while logged on as a **standard user** instead of an administrator, then you will need to also click on the **Change settings for all users** button and type in the administrator's password.

- » **To Always Run this Program as an Administrator -**  
Check the **Run this program as an administrator** box, and click on **OK**. (See screenshots above).
- » **To Not Always Run this Program as an Administrator -**  
Uncheck the **Run this program as an administrator** box, and click on **OK**. (See screenshots above) .
- » Open the program.
- » If prompted by **UAC**, then click on **Yes** to apply permission to allow the program to run with full permission as an administrator.  
**NOTE:** If you are doing this while logged in as **standard user** instead of an administrator, then you will need to provide the administrator's password before the program will run as administrator.
